RECRUITING & STAFFING SERVICES

Technical Specialists When & Where You Need Them

Automation Technical Services can help with your technical staffing needs—to handle a period of peak demand, replace key personnel, meet an aggressive deadline, or to provide specialized skills precisely when needed to get the job done.

Our recruiting staff is comprised of experienced professionals with engineering degrees and proven technical experience—guaranteeing that your technical needs are fully understood and addressed. We employ extensive screening and testing to ensure that each candidate we recommend has the right mix of hard and soft skills to fit into your team.

Whether you're looking for highly skilled professionals for Automotive, Civil, Geotechnical, Aviation, Aerospace or Defense, we are experienced in providing engineering staffing across all industries.

Automation offers flexible solutions to manage your engineering staffing needs and help your business reduce costs. From temporary staffing to direct placement and large volume staffing to manage services, we tailor our solution to meet your unique needs with:

- Contract to Hire
- Contract Engagement
- Permanent Placement
- Executive Search
- Team Project Work
- Project Management
- Coast to Coast Service
- Candidate Replacement Guarantee

Our decades of experience give us the ability to provide you with talented people with proven performance.
